PERSONAL PROJECTS

CryptoCurrency Tracker – https://github.com/KanteLabs/Crypto-Tracker

Sass, Material UI, React.js, Node.js, Google Firebase, January 2018 - Present

- Currently developing a cryptocurrency tracker that allows, users, to keep track of their assets in different cryptocurrencies.

Streetwear Boutiques – https://github.com/KanteLabs/Clothing-Marketplace

Sass, Semantic UI, Express.js, React.js, Node.js, Google Firebase, November 2017 - Present

- Designed and developed a mobile responsive, e-commerce platform, that provides a centralized location of emerging clothing brands, using React, Semantic UI, Firebase, and a REST API incorporating Google Cloud Functions with Node.js and Express.js.
- Following Agile principles, built and implemented a custom CMS, shopping cart, wishlist, product upload, and payment system using PayPal.

Link-GA – https://github.com/KanteLabs/GA-Networking-App

Material UI, JavaScript, React.js, Node.js, Express, PostgreSQL, August 2017

- Served as the lead front-end developer on a team of 4, and provided back-end support when necessary to build a full-stack web application, that followed the Model-View-Controller pattern, and acts as a social media interface for members of the General Assembly network.

Armoire Online Closet – https://github.com/KanteLabs/Armoire

Bootstrap, JavaScript, Node.js, Express, PostgreSQL, July 2017

- Created a web application that uses Shop-Style's API to help users generate an online closet based on the different articles of clothing that they own. Users can then create and edit individual outfits using the clothing in their closet.

WORK EXPERIENCE

DADA.nyc – New York, NY

Full-Stack Web Developer Intern, December 2017 – Present

- Redeveloped the main website, following mobile-first design principles, and implemented a responsive UI using HTML, CSS, JavaScript, and media queries, with Ruby on Rails on the backend.
- Reduced many performance overheads, and the number of outside frameworks by implementing reusable JavaScript components, while also adding new features to provide a better user interface and experience.

WilmerHale – New York, NY

Desktop Support Specialist Intern, August 2016 – January 2017

- Provided front-line hardware and software support for over 300 employees at the desktop, smartphone, remote access level and followed up on calls escalated from the Helpdesk as well as assist in diagnosing and resolving systemic issues with the IT team.
- Coordinated the distribution of at least 50 hardware devices, and actively tracked, diagnosed, and resolved over 600 hardware, software & network issues for clients and customers through the Assyst Ticketing System.

EDUCATION

General Assembly – New York, NY

Full-Stack Web Development, June 2017 – September 2017

- Attended a 3 Month Full-Stack Web Development course, through a scholarship provided by Per Scholas Inc, and engaged in peer programming, worked with a team using test driven development & collaboration practices in Git to develop and maintain a full-stack web application.

Year Up – New York, NY

Information Technology Student, March 2016 – February 2017

- Obtained 200+ hours of hands-on training in Information Technology as part of a one-year career development program, which includes six months of college-level courses and professional training followed by a six-month internship at WilmerHale.

University of Connecticut – Storrs, CT

B.S. Computer Science(incomplete), August 2013 – May 2015
